

# Hose Drying Cabinet

Technical data sheet

Arete Hose Drying Cabinets with integrated hot air blower are able to dry hoses within 3 hours, however, by using the time switch control, operation time can be adjusted. Cabinet frame is made from powder coated structural steel, but all shelves and mechanisms are from stainless steel.

# Hose Drying Cabinet

Technical data sheet

The whole drying process is controlled by the software, through the TFT screen. Hose Drying Cabinets are equipped with temperature and humidity sensors which will not allow to exceed 40°C and will automatically switch the cabinet off after the drying process is finished. Furthermore, the design of a cabinet makes it very robust and durable as well as makes it easy for cleaning and maintenance.

## Key Facts

Powder coated structure

Overheat sensor

Integrated hot air blower

Maintenance friendly

Easy installation

Stainless steel elements

## Technical Characteristics

Model	HDC-6	HDC-10
Length (mm)	850	850
Width (mm)	1000	1000
Height (mm)	1950	2200
Max. shelves	6	10
Remote control	No	No
Rating	3N+PE 230/400 V / 50Hz/ 4kW	3N+PE 230/400 V / 50Hz/ 4kW
Heater power	3600W	3600W
Materials	Insulated walls	Insulated walls
