

Fire Hose Storage Racks

Technical data sheet

The main carrier is robust and very stable. Structural steel frame with integrated water channels provide perfect solution for hose storage and drying. On the side parts fixing elements are located to fix shelves on the required high. All steel parts are powder coated under ISO scheme.

Fire Hose Storage Racks

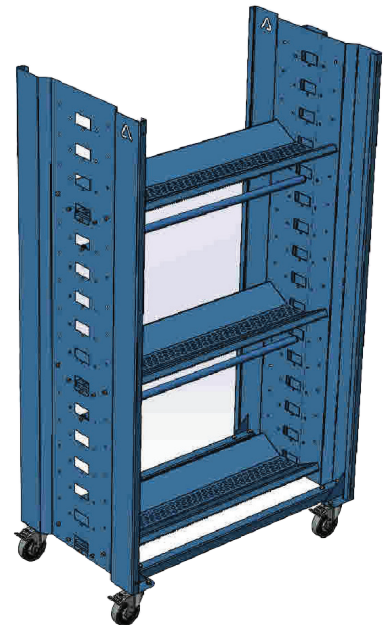

Technical data sheet

Hose Storage Racks in combination with Hose Drying Cabinets provide perfect and compact solution to keep fire hoses in the best and ready to use shape. Sophisticated design allows to install the racks in a wide variety of rooms with very limited space for storage. The rack can be wall-mounted or self-contained.
